With the Reliant Kore, MISC adds to its already impressive lineup of ships, a smaller introducto-

ry-class spacecraft. Utilizing advanced Xi'An designs, the Reliant features broad, sleek wings,

omni-directional thrusters and a fully-articulated two-seat cockpit that supports horizontal

and vertical flight modes. All of this combines with a larger carrying capacity than many ships

in its class to make the Kore a natural choice for short-range hauling, or with the simple additi-

on of a few optional components, this can-do ship can do anything you dream of.
