

NOVA

FRONT THREE- QUARTER PERSPECTIVE

The gunner's station features cutting-edge targeting and diagnostic systems to put the extensive weapon systems completely under your control.

Tumbril's new Nova is a classic battlefield warrior, reimagined for the modern age. This heavy tank offers a devastating combination of weaponry to eliminate threats on the ground and in the air.

We has updated the tread material to a new pliable composite to make it equally durable over rough terrain and paved roads.

Missile Mount

Size 4 Ballistic Cannon

Twin Weapon Mount

The entire interior features climate-control as well as a proprietary stabilization system that minimizes internal turbulence.

SIDE VIEW

The Nova also features a fully functional support station, capable of augmenting the tank by managing secondary weapons, power allocation, navigation systems and pathfinding.
