

RANGER

MODEL TR

FRONT THREE- QUARTER PERSPECTIVE

Power Plant

Designed for both speed and protection, the innovative nose has been fine-tuned to fit the needs of the specific model – whether it’s cutting the wind or repelling bullets, debris, and other projectiles.

Lights

Incorporating Tumbril’s patented adaptive X-TEC tires, the control suite not only puts every onboard system at your fingertips, it automatically adjusts tread, suspension, and resistance based on the environment.

TOP VIEW

S1 Weapon Mount

Reactive Response steering and a time-tested fade-reducing brake system works in concert with proprietary haptic suspension to keep you in command at blazing speeds.

SIDE VIEW

Integrated self-balancing technology keeps you in the optimal lateral position for traction when turning.
